SUMMARY

Information Systems graduate (GPA 3.63/4.00) and Data Analyst Intern at PT Bank Rakyat Indonesia, experienced in building Power BI dashboards for EWS and CRR monitoring and developing a logistic regression model to assess NPL probability. Skilled in Python, Pandas, and machine learning, with a strong focus on data validation, documentation, and accurate reporting.

EDUCATION

Information Systems (S1) – Universitas Komputer Indonesia **Sep 2021 – Aug 2025**

- Cumulative GPA 3.63 / 4.00 (Link)
- Relevant coursework: Networks, Operating Systems, Databases, Data Mining, Machine Learning
- Thesis: "*Word2Vec and BERT Methods for Summarizing Descriptive Text of Geological Rocks*"

WORK EXPERIENCE

Data Analyst Intern – PT Bank Rakyat Indonesia (Persero) Tbk. **Aug 2026 – Present**

- Developed interactive Power BI dashboards to visualize Early Warning System (EWS) metrics for Small and Medium segments, along with Credit Risk Rating (CRR), helping the team monitor portfolio risk and detect early warning signals sooner. (Link)
- Conducted data validation and developed a logistic regression model to assess NPL probability at the debtor level, supporting more accurate risk classification and giving the team a data-driven basis for prioritizing debtors that need closer monitoring and follow-up.

IT Support Intern – PLN UP3 Cimahi **Jun 2024 – Aug 2024**

- Improved troubleshooting efficiency by identifying recurring IT issue patterns and designing a knowledge management system integrated with the ticketing platform, so that solutions to recurring issues could be found and reused faster by the IT team.
- Handled 10+ daily support requests in accordance with SOPs, ensuring every ticket was fully documented, logged in the internal system, and resolved on time per compliance procedures, maintaining consistent service quality and complete, audit-ready records.

PROJECTS

Comparative Study of NLP Models – Museum Geologi Bandung (Link) **Mar 2025 – Jun 2025**

- Compared 4 NLP models (Word2Vec, BERT, BART, T5) using ROUGE metrics for text summarization, with BART achieving the highest score (0.75), while managing 500+ text records from Museum Geologi Bandung through preprocessing, labeling, and documentation, so that all four models were evaluated using clean, consistent, and well-structured data for a fair model comparison.
- Compiled a comprehensive research report covering model performance analysis, strengths and weaknesses, and implementation recommendations for the comparative study, providing a useful reference for selecting the most suitable summarization approach.

Elderly Nutritional Status Study – Sibulan (Link) **Jun 2025 – Jul 2025**

- Collected and analyzed nutritional data from 20 elderly participants of the SIBULAN program using structured interviews, anthropometric measurements, and the 18-item MNA-LF questionnaire, providing a reliable basis for classifying nutritional status.
- Applied quantitative cross-sectional design to classify nutritional status, identifying meal frequency, protein intake, and fruit consumption as key determinants among the elderly participants, which became the primary basis for the study's recommendations.
- Co-authored research paper finding 50% well-nourished, 30% at-risk, and 20% malnourished, contributing policy recommendations for menu diversification, nutrition education, and routine MNA-LF screening within the SIBULAN program and similar activities.

ORGANIZATIONAL EXPERIENCE

Gerakan Disiplin Sukajadi (GDS)

- Served as a community outreach volunteer for a traffic-order campaign, delivering structured information to the public in line with established procedures, helping to raise public awareness and encourage orderly traffic behavior in the wider Sukajadi community.

Nasi Bekal Untuk Lansia (SIBULAN)

- Coordinated distribution of nutritious meals to elderly beneficiaries, documented recipients, and prepared periodic reports for program evaluation, ensuring every distribution was properly documented so the program's results could be reviewed accurately.

Gerakan Dua Puluh Ribu Rupiah (GERAH)

- Participated in fundraising and social activities, managing donation records with attention to administrative accuracy and teamwork.

CERTIFICATIONS

- **CCNA: Introduction to Networks** – Cisco (Link) **Feb 2023**
- **CCNAv7: Switching, Routing, and Wireless Essentials** – Cisco (Link) **Aug 2023**
- **TOEFL Certificate** – Language Center Division UNIKOM (Link) **Apr 2025**
- **Programming and Software Development** – Media Informatika Professional Certification (Link) **Dec 2025**

SKILLS

Hard Skills: Microsoft Office (Word, Excel, PowerPoint, Visio) | Power BI | Python | Data Management (Pandas, NumPy) | Logistic Regression | Machine Learning | NLP | Figma | Ticketing & Documentation Management Systems | Operational Administration & Reporting | Internal/ERP Application Operations
Soft Skills: logistic regression, credit risk, NPL, Early Warning System, DAX, machine learning, scikit-learn , SQL, PySpark
Language: Indonesian (Native), English (Proficient)
